Table 1.2

1.1.2 Annual Flying Hour Reconciliation - The Government shall provide the certified CNO BAR flight hours (actual flight hours) for each model aircraft after the completion of each GFY performance period. The actual flight hours for each model are then multiplied by the corresponding variable "Dollar per FH" price for each model. The resultant prices for each model are then added to determine the reconciled variable part of the MHSCo program price for that GFY performance period.

Example

Assume certified BAR reported actual flight hours for Performance Period 4 (FY 2013) as follows:

Performance Period 4	H	S	S Non-Warranty	B	F	R	R Non-warranty	
2013 BAR Flight Hrs	5,000	75,000	62,000	30,000	7,000	60,000	40,000	

Multiply each model's flight hours by the corresponding Dollar per FH determine the reconciled variable part of the program price:

Performance Period 4	H	S	S Non-Warranty	B	F	R	R Non-warranty	Total
2013 BAR Fit Hrs	5,000	75,000	62,000	30,000	7,000	60,000	40,000	
2013 Dollars per FH								
2013 Reconciled Variable Price								(b)(4)

The variable part of the program price, reconciled for actual flight hours, is \$260,704,761

1.1.3 Total Program Price Reconciliation – The reconciled Variable Part of the Program Price is then added to the Fixed Part of the Program Price, from Table 1.1 to determine the final reconciled Program Price for the performance period. The final reconciled Program Price is compared to the Total Program Price in Table 1.1 prior to the reconciliation resulting in an increase or decrease attributed to the annual Flying Hour Reconciliation. The amount of the reconciliation will be incorporated into the contract via a contract modification, increasing or decreasing the amount of contract value and funding, accordingly. In the example, the reconciliation would result in a decrease.

Table 1.2

1.1.2 Annual Flying Hour Reconciliation - The Government shall provide the certified CNO BAR flight hours (actual flight hours) for each model aircraft after the completion of each GFY performance period. The actual flight hours for each model are then multiplied by the corresponding variable "Dollar per FH" price for each model. The resultant prices for each model are then added to determine the reconciled variable part of the MHSCo program price for that GFY performance period.

Example

Assume certified BAR reported actual flight hours for Performance Period 4 (FY 2013) as follows:

Performance Period 4	H	S	S Non-Warranty	B	F	R	R Non-warranty	
2013 BAR Flight Hrs	5,000	75,000	62,000	30,000	7,000	60,000	40,000	

Multiply each model's flight hours by the corresponding Dollar per FH determine the reconciled variable part of the program price:

Performance Period 4	H	S	S Non-Warranty	B	F	R	R Non-warranty	Total
2013 BAR Flt Hrs	5,000	75,000	62,000	30,000	7,000	60,000	40,000	
2013 Dollars per FH							(b)(4)	
2013 Reconciled Variable Price								

The variable part of the program price, reconciled for actual flight hours, is \$260,704,761

1.1.3 Total Program Price Reconciliation – The reconciled Variable Part of the Program Price is then added to the Fixed Part of the Program Price, from Table 1.1 to determine the final reconciled Program Price for the performance period. The final reconciled Program Price is compared to the Total Program Price in Table 1.1 prior to the reconciliation resulting in an increase or decrease attributed to the annual Flying Hour Reconciliation. The amount of the reconciliation will be incorporated into the contract via a contract modification, increasing or decreasing the amount of contract value and funding, accordingly. In the example, the reconciliation would result in a decrease of  (b)(4)
